Activity or situation:  <b>RA 029A Omicron Variant Full Opening of school v1 29th Nov 2021</b>	Review date : weekly review following date above	Signature: J. Le Feuvre

**Background information**

**This update is in response to the DfE update on 29<sup>th</sup> November 2021 due to the new Omicron variant. DfE Schools operational guidance updated 08.59 29<sup>th</sup> Nov 2021.**

**School Opening**

DfE guidance for schools during the coronavirus COVID 19 pandemic has been that schools are required to have a full school opening risk assessment which is regularly reviewed and updated, treating them as 'living documents', as the circumstances in your school and the public health advice changes. This includes having active arrangements in place to monitor whether the controls are effective and working as planned.

This risk assessment applies to:

- primary schools
- secondary schools (including sixth forms)
- special schools, special post-16 providers and alternative provision
- 16 to 19 academies
- infant, junior, middle, upper schools

**Please note that this risk assessment has been created in line with the current guidance. It contains sample control measures that fit with the DfE system of controls. One size does not fit all, and schools should make this model risk assessment their own and reflect any local measures, particularly local HPT's guidance.**

### **Guidance**

This risk assessment has regard to all relevant guidance and legislation including, but not limited to, the following:

- The Health Protection (Notification) Regulations 2010
- The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013
- Public Health England (PHE) (2017) 'Health protection in schools and other childcare facilities'
- **NEW** DfE (2021) 'Schools COVID-19 operational guidance' July 2021
- **UPDATED** DfE (2021) 'Actions for early years and childcare settings during the coronavirus (COVID-19) outbreak'
- DfE (2021) 'Face coverings in education'
- **UPDATED** 'Actions for out of school settings' July 2021

### **Legislation and guidance**

Health and Safety at Work Act etc. 1974

Management of H&S at Work Regulations 1999

Workplace (Health, Safety and Welfare) Regulations 1992

Risk Rating	Action Required
20 - 25	<b>Unacceptable</b> – stop activity and make immediate improvements
10 - 16	<b>Urgent action</b> – take immediate action and stop activity, if necessary, maintain existing controls vigorously
5 - 9	<b>Action</b> – Improve within specific timescales
3 - 4	<b>Monitor</b> – but look to improve at review or if there is a significant change
1 - 2	<b>Acceptable</b> – no further action but ensure controls are maintained & reviewed

(1) List hazards **something with the potential to cause harm** here

(2) List groups of people who are especially at risk from the significant hazards which you have identified

List existing controls here or note where the information may be found. Then try to quantify the level of risk **the likelihood of harm arising** that remains when the existing controls are in place based on the number of persons affected, how often they are exposed to the hazard and the severity of any consequence. Use this column to list the controls that you might take and develop all or some of that list into a workable action plan. Have regard for the level of risk, the cost of any action and the benefit you expect to gain. Agree the action plan with your team leader and make a note of it overleaf. If it is agreed that no further action is to be taken this too should be noted.
